

Marker Floats

Rugged and highly visible, our marker floats are used in ROV and Survey operations around the world. Due to their unique acoustic signature and high visibility coloration they are a popular choice for marking bottom location to facilitate ROV maneuvering.

These units are extremely reliable. They can't leak or implode. A tough rotationally-molded exterior shell resists damage to the DeepTec™ solid syntactic foam core even during the roughest handling on deck.

DEPTH	PART NUMBER	UPLIFT IN LBS/KG
3000	MF-009-3000	8.7 / 4.0
4000	MF-009-4000	7.9 / 3.6
6000	MF-009-6000	7.9 / 3.6

Other depths and diameters available upon request.
